Kael LISSARRAGUE

Software Developer, AI Applications

Paris, France | +33 7 78 07 64 56 | KaelLissarrague@outlook.com
Portfolio: grimnodt.github.io | github.com/Grimnodt | linkedin.com/in/kael-lissarrague

I build applications that use **generative AI** and work on text classification in Python. My experience at AmeXio combines software development, business requirements analysis and shared team coordination.

Professional experience

AmeXio Group, Paris — 2025 - 2026

Software Developer and Business Analyst

Work-study placement: September 2025 to September 2026. Internship: May to August 2025.

- Led the Quality Document Management demonstrator migration from **Nuxeo** LTS 2023 to LTS 2025 during my work-study placement. Analysis, design, development and validation.
- Business Analyst for the **CNAM-CEPS** information system redesign: requirements analysis and issue tracking.
- Wrote **over 20** functional specification documents, **over 40** functional test documents and **3 test strategies**.
- Java and JavaScript development. Configured Nuxeo workflows, document lifecycles and types. Shared coordination of a four-person team.

National Technical University of Athens, Greece — May - August 2024

Python Data Analysis Intern

Biological data analysis in **Python** with NumPy and pandas, within an English-speaking research team.

Projects

Anti-spam Mail — 2026

I built this **Windows application** to reduce manual email sorting and flag suspicious messages. Multi-account Outlook integration using Microsoft Graph and OAuth 2.
Local ML prototype trained on **3,085 emails**, with **92.6%** correct classifications on 1,149 historical emails.
React, TypeScript, Tauri, Rust, Python, scikit-learn. Test version on my portfolio

CoverLetterAI — 2026

I built a **SaaS** using Gemini to write a cover letter tailored to a CV and job description in **3 minutes** on average, with an estimated **88%** time saving. Editing, PDF export, Stripe payments and credits. Deployed on Netlify.
TypeScript, React, Next.js, Gemini, PostgreSQL, Prisma. coverletterai.space

Atelier — 2026

I built a **Windows application** to centralize projects and businesses, simplify management and save time. It tracks finances, deployments and AI costs through 5 service connectors.
Electron, Node.js, JavaScript, REST APIs. Project details on my portfolio

Skills

AI and data: Python, NumPy, pandas, scikit-learn, text classification, data preparation, model evaluation, LLM APIs, Gemini, SQL, PostgreSQL

Development: TypeScript, JavaScript, Java, React, Next.js, Angular, Spring Boot, REST APIs

Deployment and quality: Git, Docker, CI/CD, Azure, Netlify, Vercel, Linux, JUnit, Scrum, Jira

Education and certifications

Master's degree in Gphy — 2024 - 2026

Computer Engineering and Life Sciences. University of Poitiers.

Google AI. Google / Coursera. Training completed, certificate pending.

IBM Machine Learning. IBM / Coursera. Training in progress.

Certified Studio Developer Associate. Nuxeo / Hyland.

Languages

French: native. **English:** C1, TOEIC.
